INSIDE: RENEW YOUR MEMBERSHIP

Dear Friend,

In 2010, a group of neighbors gathered weekly at a round table in the front window of T-Bock's Sports Bar & Grill. Like you, these people believed a dramatic shift toward clean energy and energy efficiency could create a better life for all residents of our county. Like you, they were undeterred by gridlock in national politics. *Like you, they knew that positive change could happen right here in Winneshiek County.*

And since then? **Thanks to members like you, the past decade has been a powerful time of clean energy progress in our community.** Together, we implemented energy efficiency measures in more than 1,200 homes, farms, and businesses - including hundreds of low income households. We promoted locally-owned solar through workshops, technical assistance, and advocacy. As a result, Winneshiek County has \$350 million invested in solar systems—more than 10 times the state average! Our model for a grassroots approach to action has been adopted by 9 additional counties across Iowa, so far.

We need your help to make the next decade even more powerful than the first. Please renew your membership today! ***An increase in your donation this year will be DOUBLED by generous matching funds, so please consider "powering up" to help us raise \$65,000 for clean energy work.***

As we look towards the next 10 years of the Winneshiek Energy District, we envision schools, libraries, and city halls powered with solar energy; stable and fair electricity rates for everyone; electric vehicle charging in every downtown; and an Energy District in every county in Iowa.

There's lots of work to do, and we cannot do it without our members! Thank you for your ongoing support. Together, we'll create a clean energy future right here in Winneshiek County!

Sincerely,

Andy Johnson, Executive Director at the Winneshiek Energy District

Yes! I will support local, clean energy and RENEW today.
