

APRIL 2024

Renewable Energy Tax Credits

Solar, wind, geothermal, biomass, fuel cell and battery storage tax credit of 30%!

Timeline and Details:

- 30% federal tax credit for solar, wind, geothermal and battery storage for projects installed through 2032; these tax credits do not have a maximum dollar cap
- Battery storage backup ≥ 3 kW (with or without associated solar production) is eligible for a 30% tax credit with no maximum dollar cap
- To take advantage of credit, taxpayer must have tax liability, unused portions may be carried forward and used in subsequent tax years
- Entities without tax liability like schools, religious institutions, non profit organizations and municipal governments are eligible for reimbursement of credit's value through new direct pay program. Learn more at <https://www.irs.gov/credits-deductions/elective-pay-and-transferability>
